126 pages and profusely illustrated with more than 260 illustrations diagrams and charts size 8 250 x 10 750 inches originally published by floyd clymer in 1969 with coverage for the 1969 and earlier 4 speed and 5 speed 250cc and 360cc models while this 2025 edition includes all of the data from the original publication it has also been expanded to include data for the 125cc and 380cc engines which extends the coverage through 1974 cz motorcycles of this era were identified by a three digit type number occasionally followed by a numerical suffix for example type 984 9 the suffix number identifies model variations and or year of manufacture within each type group unfortunately the use of the type number is extremely model specific and in order to eliminate any confusion the data included in this manual is appropriate for the single exhaust pipe 4 speed and 5 speed cz motocross enduro and ruff country models however for the sake of completeness the manual states that coverage includes the following model types type 984 125cc motocross type 968 250cc motocross single pipe type 980 250cc motocross type 988 250cc enduro type 969 360cc motocross single pipe type 981 380cc motocross from 1964 to 1966 the type 968 and type 969 were available with twin pipe engines they are not covered in this manual however as many of the other mechanical components are shared with the single pipe machines this manual will also be of use to owners of those twin pipe models we encourage you to exercise caution when purchasing technical publications for your classic motorcycle or automobile as many of the reprints found on internet websites are from bedroom sellers at enticingly low prices by individuals that really have no idea what they are selling many are nothing more than poor quality digital comb bound or ring bound photocopies that are scanned or printed complete with greasy pages and thumbprints and as such are deceptively described as pre owned used or even refurbished in addition they are often advertised for the incorrect series and or model years however velocepress com has been publishing reprints of motorcycle and automobile manuals since 2003 and our publications have earned excellent reviews

140 pages and more than 140 illustrations and charts size 8 25 x 10 75 inches the original norton factory twin cylinder workshop manual contained maintenance and repair data for both the lightweight and heavyweight norton twins manufactured between 1960 and 1968 including the 750cc atlas model which was in production from 1962 1968 as many of the mechanical attributes from the atlas series were carried over into the early norton commando models we felt that the original twin cylinder manual was somewhat lacking as it did not include repair data for the early commando that evolved from the atlas consequently we have updated and expanded this floyd clymer edition of the original twin cylinder manual to include the oem norton manual part no 06 3062 for the 1968 1970 commando 750cc models that were fitted with the atlas style exhaust and external rev counter drive to the timing cover beginning with engine no 126125 february 1968 and the early camshaft driven contact breaker models from engine no 131257 march 1969 while there is some duplication between the atlas and commando repair information we felt that the commando manual should be included in its entirety in order to complete the coverage of the original twin cylinder manual from 1960 through the 1970 model year it should also be noted that this manual includes significant maintenance and repair information for the amc norton matchless g15 hybrids that were manufactured from 1963 1967 engine numbers 107388 to 124371 important note many of the reprints found on internet websites are from bedroom sellers at enticingly low prices by individuals that really have no idea what they are selling many are nothing more than poor quality comb bound photocopies that are scanned and published complete with greasy pages and thumbprints and as such are deceptively described as pre owned in addition they are often advertised for the incorrect series and or model years of motorcycles however velocepress com has been publishing licensed reprints of motorcycle and automobile manuals since 2003 and our publications have earned excellent reviews worldwide so you can be assured you are purchasing a quality product we are pleased to offer this combined reprint of the factory twin cylinder and commando 06 3062 workshop manuals models covered are lightweight models jubilee 250cc 1960 1966 navigator 350cc 1961 1965 electra 400cc 1963 1965 heavyweight models model 88 500cc 1960 1966 model 99 600cc 1960 1962 650ss 650cc 1962 1968 atlas 750cc 1962 1968 g15 750cc 1963 1967 amc norton matchless hybrid commando 750cc 1968 1970 models only important please note that the 750cc commando manual is only applicable to the 1968 1970 models owners of later commando models are directed to our 1970 1975 manual isbn 9781588502438 and mkiii owners to our 1975 1978 manual isbn 9781588502445

a faithful reproduction of the 1970 floyd clymer publication of the official factory suzuki workshop manual for the t20 and t200 series of motorcycles including the 250cc super six and x6 hustler and the 200cc x5 invader and sting ray scrambler there are comprehensive tables of technical data tolerances and fits and all of the expected data from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components making it an invaluable resource for collectors and restorers of these classic suzuki motorcycles there are 177 illustrations and each procedure is explained in a step by step method using an appropriate illustration the translation from japanese to english is at times a little quirky but the illustrations make up for any difficulty in understanding what needs to be done out of print and unavailable for many years this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all suzuki enthusiasts worldwide

128 pages and more than 150 illustrations and charts size 8 25 x 10 75 inches this manual is a compilation of 3 publications 1 a workshop manual for the penton 175cc jackpiner the 250cc hare scrambler and the 400cc mint models 2 an illustrated frame and chassis parts manual and 3 an illustrated 175 250 400cc ktm engine parts manual this publication is also appropriate for the ktm mc motocross and gs gelande sport machines that utilize these same engines a brief explanation of the association between penton and ktm in 1967 when john penton approached ktm austria with a plan to manufacture off road motorcycles to his design it was obviously seen as an opportunity by ktm to gain a foothold in the expanding usa off road motorcycle market certainly having someone like john penton representing their product was a major win for ktm as john s prominent status in off road racing was already well established the first of the penton ktm joint venture motorcycles the berkshire 100 and six day 125 models powered by sachs engines arrived in the usa in 1968 the use of a sachs powertrain was an obvious choice for ktm who without any in house engine capability had been using sachs engines in their moped scooter and road going motorcycles since the early 1950 s while the sachs powered off road machines established a solid foothold for penton motorcycles john began to pressure ktm to construct an engine of their own design the first of the penton models powered by ktm engines debuted in 1972 as the 175cc jackpiner followed in 1973 by the 250cc hare and the 400cc mint in 1974 see workshop manual isbn 9781588502933 for sachs powered pentons however ktm was also marketing identical ktm badged bikes as mc motocross and gs gelande sport models on an international level obviously this did not sit well with john and the situation worsened when those same ktm badged bikes began to show up on the west coast through a different usa importer the 1976

mc 5 and cross country and the 1977 gs 6 pentons were also badged and sold as ktm s and the association between john and ktm continued to deteriorate in the interim ktm had been pressuring john to relinquish control of his distribution rights and in 1978 ktm purchased both the distribution rights and the company infrastructure and the penton brand was no more a sad end to an era of great innovation by john penton however his motorcycles and the identical ktm versions are regarded as some of the best ever to come out of the 1970 s off road motorcycle phenomenon and are highly collectible and still used in vintage events by enthusiasts worldwide unfortunately owners of these early penton motorcycles are subjected to considerable confusion surrounding the appropriate selection of the multitude of originals and reprints of the various manuals and parts lists that have recently flooded the marketplace we encourage you to exercise caution when purchasing a manual for your motorcycle or automobile as many of the reprints found on internet websites are from bedroom sellers at enticingly low prices by individuals that have no idea what they are selling many are nothing more than poor quality comb bound or ring bound photocopies that are scanned and printed complete with greasy pages and thumbprints and as such are deceptively described as pre owned used or even refurbished in addition they are often advertised for the incorrect series and or model years

108 pages and more than 120 illustrations and charts, size 8 1/4 x 10 3/4 inches, this manual covers the overhaul and maintenance of the engines that were installed in the 1972 to 1978 Penton KTM series of off road motorcycles. In addition, it also includes an illustrated parts manual for those same engines from 1972 onwards. The majority of Penton motorcycles utilized KTM engines. The most recognizable early Penton KTM machines were the 175cc Jackpiner, the 250cc Hare Scrambler, and the 400cc Mint. In 1976, the Penton KTM MC 5 and cross country models were introduced, followed by the GS 6 in 1977. All available with 125cc, 175cc, 250cc, and 400cc engine options. This manual is a compilation of the April 1979 KTM engine repair instructions and the May 1977 parts manual. It should be noted that KTM identifies their 1972 to 1979 series of engines by type numbers, and the engines covered in this manual are the 125cc type 51 (1975-1976), 175cc type 52 (1972-1979), 250cc type 54 (1973-1979), and 400cc type 55 (1974-1978). A brief explanation of the association between Penton and KTM: In 1967, when John Penton approached KTM Austria with a plan to manufacture off road motorcycles to his design, it was obviously seen as an opportunity by KTM to gain a foothold in the expanding USA off road motorcycle market. Certainly, having someone like John Penton, representing their product, was a major win for KTM, as John's prominent status in off road racing was already well established. The first of the Penton KTM joint venture motorcycles, the Berkshire 100 and Six Day 125 models, powered by Sachs engines, arrived in the USA in 1968. The use of a Sachs powertrain was an obvious choice for KTM, who without any in-house engine capability, had been using Sachs engines in their moped, scooter, and road going motorcycles since the early 1950s, while the Sachs powered off road machines

established a solid foothold for penton motorcycles john began to pressure ktm to construct an engine of their own design the first of the penton models powered by ktm engines debuted in 1972 as the 175cc jackpiner followed in 1973 by the 250cc hare and the 400cc mint in 1974 these penton ktm powered models are covered in workshop manual isbn 9781588503077 for sachs powered pentons see workshop manual isbn 9781588502933 however ktm was also marketing identical ktm badged bikes as mc motocross and gs gelande sport models on an international level obviously this did not sit well with john and the situation worsened when those same ktm badged bikes began to show up on the west coast through a different usa importer the 1976 mc 5 and cross country and the 1977 gs 6 pentons were also badged and sold as ktm s and the association between john and ktm continued to deteriorate in the interim ktm had been pressuring john to relinquish control of his distribution rights and in 1978 ktm purchased both the distribution rights and the company infrastructure and the penton brand was no more a sad end to an era of great innovation by john penton however his motorcycles and the identical ktm versions are regarded as some of the best ever to come out of the 1970 s off road motorcycle phenomenon and are highly collectible and still used in vintage events by enthusiasts worldwide
